More to come

Farming

If you provide liquidity for trades, you will be rewarded for RBC tokens when the trade is executed (upcoming)

Instant Trade

Execute an instant trade using external DEXs (while getting best rates)

Pools

Create pools for DEXs by having 1 token (upcoming)

Limit Order

Set the desired rate and the deal will be executed when one of the DEXs meets your requirements (upcoming)

Tokenomics

Rubic platform has an ERC-20 token, "RBC", which is used as the fuel within the Platform.

Platform generates revenue from instant trades, brokerage fees and others. 50% of the revenue will be sent to Liquidity, while the other 50% will be used for operational needs.

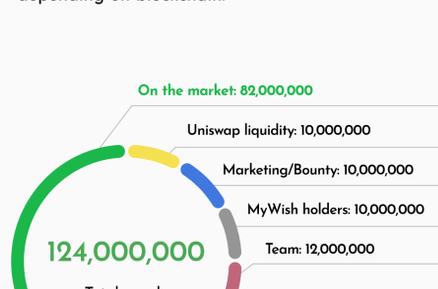

Our platform will charge the users for the following operations:

Trade creation	Brokers function usage	Token listing	Crowdsale contract usage	Others services
----------------	------------------------	---------------	--------------------------	-----------------

Fees can be in RBC, Ethers, TRX or BNB depending on blockchain.

Accounting with Relayers, external services, marketing services are made in RBC token.

- 10% of tokens is reserved for the team. All tokens are locked, and every 3 months they will be unlocked by 2% (over a year).
- 8% of tokens is directed at conducting marketing and bounty campaigns. 4% of tokens are frozen for 4 months.
- 8% of tokens are distributed to MyWish holders and will be unlocked every 3 months by 2% (over a year).
- 66% of tokens are put up on the market.
- 8% of tokens are allocated for Uniswap Liquidity.
